# Objectives

01

What is technology?

02

Negative impacts on society

03

Positive impacts on society

04

Conclusion

# What is Technology?

- Technology is the result of accumulated knowledge and application of skills, methods, and processes used in industrial production and scientific research.

\* It is the application of scientific knowledge to the practical aims of human life.

- Technology is a medium which makes our life easier, convenient,faster and efficient.
- In short,It is the branch of knowledge dealing with engineering or applied sciences.
- 

# **Positive Impacts Of Technology In Our Society**

- Healthcare & wellness advancements
- Equal opportunities
- Mechanized Agriculture
- Easy to access information
- Improved Education and learning process
- Improved Communication

# Healthcare and wellness advancements

Tech possesses an enormous potential to improve health and healthcare systems as we know them. From AI-powered clinical drug trials through enabling preventative patients' monitoring up to wellness solutions like wearables. We have seen tech minding the gap in healthcare in the pandemic. Telemedicine apps are the first step to making healthcare more equitable and accessible for all, no matter their socioeconomic status.

# Equal Opportunities

The universal value behind technology is bringing equality to products and services and minimizing socioeconomic gaps among societies and people. As described above, tech makes health and education available to more people, making it easier to learn and get care, no matter their background.

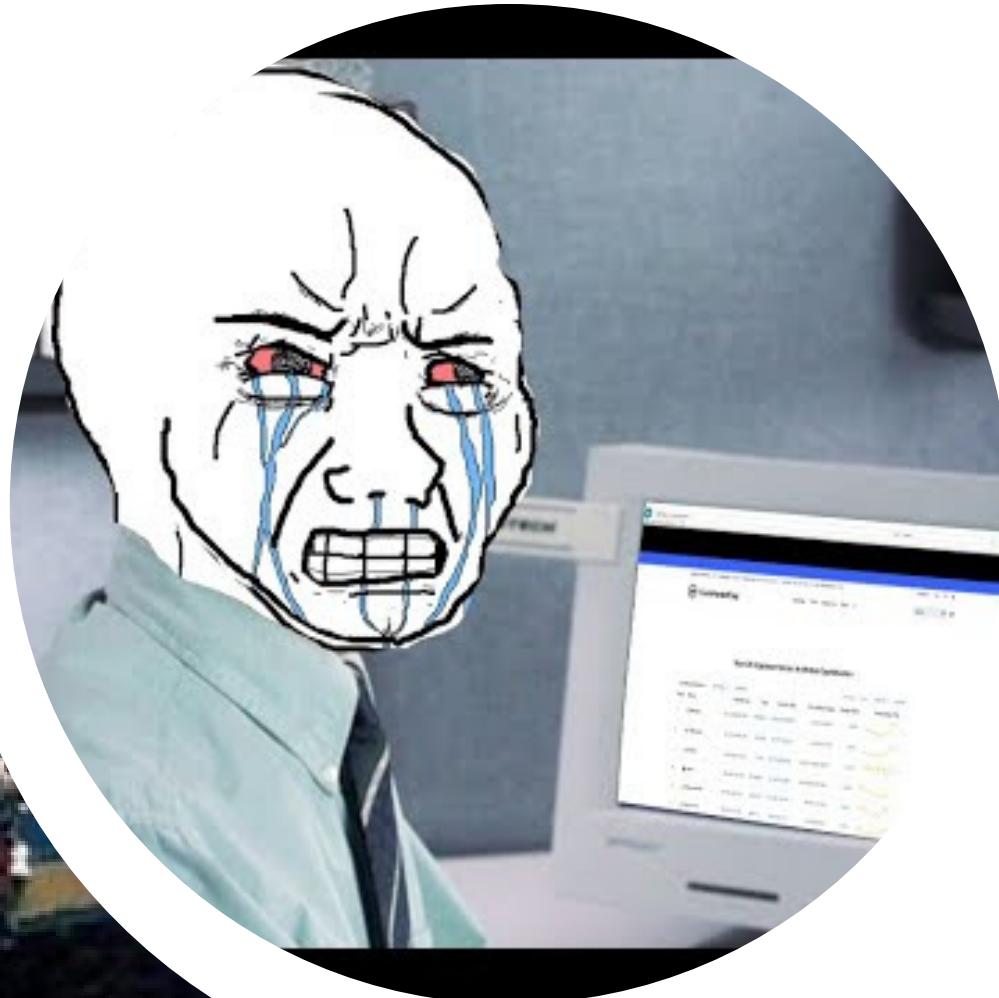

# Improved Education and learning process

Technology enhances the education and learning process. Nowadays, people can easily enhance their knowledge using the internet. Most of the data is present on the internet is free of cost, and you can access this data anytime and anywhere.

# **Negative Impacts Of Technology In Our Society**

- Fake news & misinformation
- Increase in unemployment
- Increase in pollution
- Increase in cybercrimes
- Increase in health and mental concerns

# Fake news & misinformation

Fake news and misinformation have been with us for quite some time, but with the tech advancements moving rapidly, people find it hard to keep up with what's true and what's not. Deepfakes are an example of quite a recent threat and a big pain for all social media platforms. Numerous deepfake incidents have already happened.

# Increase in unemployment

Nowadays, large and small business uses machinery and technical equipment because of their low costing and high efficiency due to which the rate of unemployment is increasing continuously. Since 2000, at least 260,000 jobs have been lost in the US to automation. This represents roughly 2% of the country's total manufacturing workforce, and the numbers only increase each year exponentially.

# Increase in pollution

Not only humans but technology also affecting our environment. Due to vehicles and machinery, the rate of pollution is increasing continuously which causes global warming, etc. Environmental pollution occurs as a result of technology mismanagement and a lack of control measures. Emission of large quantity of gases such as CO<sub>2</sub> in the air by large industries causes air pollution which in turn has degraded environment immensely.

# Conclusion

All the technology have forced us into a lazy-minded state. Technology as a whole has many pros and cons. The "pros" tend to lean more towards making our life easier and making it take less time to get things done. The "con's" are primarily that we take these technologies for granted and lose sight of reality. As a result, this society today has moved towardssocial media sites as their primary form of communication among friends instead of being more sodal in the real world Society is moving away from Unfortunately, we can do social interactions. there's not much Negatives with this information except hope that people come to realize it Positives.

The background features a dark blue gradient with a subtle grid pattern. Overlaid on this are several large, semi-transparent circles with a pink-to-orange gradient. One large circle is in the bottom left corner, another is in the top right, and smaller ones are scattered across the upper left and center.

# Thank You
